

Montegrappa is the brand new platform of the alloy range. New mold in typical Wilier style with new technologies and, of course, new colors. These are the most important features:

1. Lower and aero seat stays
2. ALU 6061 double butted tubes
3. Internal cable routing
4. Tapered headtube
5. Diametro reggisella da 27.2 mm
6. Fork available in carbon monocoque
7. Geometries are close to the GTR SL with racing geometry but little bit relaxed

REAR STAYS

The rear stays is an exclusive design developed by Wilier Triestina engineers. We built a new mold to find a solution close to the aero property of AIR series and MY2016 GTR series.

Lower stays for a more modern look and better Aerodynamic efficiency.

INTEGRATED CABLED

I cavi di comando scorrono all'interno del telaio. Una novità per i telai in alluminio da corsa per avvicinarsi sempre più alle caratteristiche costruttive adoperate sui nostri telai in fibra di carbonio. Senza nessun cavo esterno abbiamo un telaio pulito, con un look più moderno e con un efficienza aerodinamica maggiore.

TAPERED HEADTUBE

The headtube of the new Montegrappa has the same shape of the high-end carbon frames. Different diameters to better handle the bike. 1" $\frac{1}{4}$ on top and 1" $\frac{1}{8}$ on the bottom of the headtube. With this solution Montegrappa has a stiffer front, better confort and better precision while descend at high speed.
