

JAREEN

The Jareen is the new double-butted 6061 aluminum frame dedicated to the gravel world and built in Wilier Triestina style: with cabling integrated in the frame, differentiated diameter head tube, 27.2 mm diameter seat-post for greater comfort, flat mount disc brake system, and alloy fork with through axle. For maximum versatility, the frame has been designed to mount mudguards and front and rear racks, and frame and front fork tire clearance is up to 42mm.
