

GCU Dongle

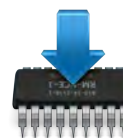

Range Extender

Ebike Charger

USB stick  
(Empty, FAT32  
& under 32 GB)

### Firmware Files

The files that you need to update the Range Extender can be downloaded from this link (An internet connection is required):

1° Unzip the downloaded ZIP file.  
2° Copy the unzipped files to the root of the USB.

 **The USB drive must only contain these files.**

## INSTRUCTIONS

1. Connect the charger to the alternating current (AC).

2. Connect the GCU to the charger.

3. Connect the other ending of the GCU to the charging port on the range extender (at this point Range extender shall switch on by action of the charger).

4. Turn ON the range extender.

5. Connect the USB to the GCU USB port.

6. The GCU shall start blinking in yellow.  
--> update ongoing

7. Await approx.. for 1 minute till the GCU LED goes to green .  
--> update completed.

8. Remove the USB from the GCU and then the GCU from the range.
